Broward County Health Plan

The Health Plan is a dynamic document, continually updated, to ensure availability of the most current information. It covers a vast spectrum of topics, from labor force statistics to immunization rates, reflecting the broad scope of issues affecting public health, as well as highlighting the correlation between socioeconomics and community health. The Health Plan is divided into seven chapters to address the multifaceted healthcare system in Broward County as follows:

CHAPTER I: REGIONAL PROFILE provides demographic and socioeconomic indicators influencing health status and impacting availability of health resources that contribute to increasing utilization rates and decreasing availability of healthcare financing.

CHAPTER II: HEALTH STATUS outlines community health status through five broad health categories: Maternal and Child Health, Behavioral Health, Oral Health, School Health and Morbidity and Mortality.

CHAPTER III: HEALTH RESOURCES provides an overview of health resources currently available in Broward County.

CHAPTER IV: HEALTHCARE UTILIZATION provides healthcare utilization data. Broward County's diversity as well as the seasonal fluctuations in population can influence utilization.

CHAPTER V: HEALTHCARE FINANCING discusses the increasingly complex topic of healthcare financing. It outlines numerous sources of healthcare financing in Broward and provides a brief description of healthcare funding.

CHAPTER VI: BENCHMARKS sets annual community health priorities, identifies community interventions, and measures progress attaining health improvements.

CHAPTER VII: THE HEALTH DATA WAREHOUSE explains and examines the Health Indictor modules from the Health Data Warehouse which include: 1) Prevention Quality Indicators/Avoidable Admissions, 2) Inpatient Chronic Conditions (ICD-9), 3) Suicide Incidence, 4) ED Acuity Stratification (CPT) and 5) NYU Algorithm ED Preventable/ Avoidable Admissions.

INTRODUCTION

The Broward Regional Profile provides demographic and socioeconomic factors influencing health status and impacting availability of health resources, which results in increased utilization rates and decreased availability in healthcare financing. Factors discussed in this chapter directly and indirectly impact Broward residents' health status.

DEMOGRAPHIC CHARACTERISTICS

Age

As illustrated in Figure 1, the 45 to 54 age group represents the largest age group in Broward.

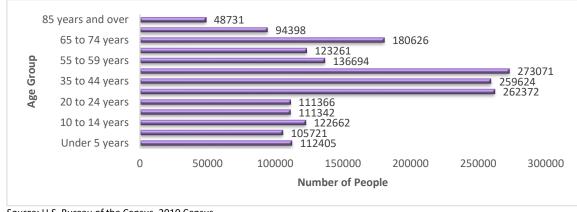

Source: U.S. Bureau of the Census, American Community Survey (DP05) 2018, 2019, 2020

Race/Ethnicity

According to the 2010 Census, Broward County has become the most racially diverse county in South Florida (when compared to Palm Beach and Miami-Dade Counties) and continues to become even more diverse today. The population of Broward continues to grow and has reached 1,947,026 2022. The percentages of Broward and Florida's populations by race are depicted in Table 1 and Table 2. In 2010 and 2022, Broward had higher percentages of minorities than Florida as a whole, further illustrating the diversity in the county. The tables also illustrate that "White" represents the largest proportion of the population, followed by "Black/African American."

Broward's Hispanic population is growing at a faster rate than Black and non-Hispanics. The County's Hispanic population continues to grow more diverse, as new residents from Puerto Rico, Cuba, Columbia, Dominican Republic, Peru, Honduras, and Venezuela establish communities in the region (each with more than 30,000 residents). According to the 2020 US Census estimates, Broward is home to 633,567 Hispanics, comprising 32.5 percent of the Broward population.

More than seven of every ten new residents in the last decade emigrated from another country. Although there is growing diversity due from Europe and Asia, Latin America and the Caribbean continue to be the primary sources of international migration into South Florida. According to the 2022 American Community Survey, the number of Haitians residing in Broward is approximately 131,46 3and the number of Jamaicans is 108,236.

IMMIGRATION & MIGRATION

Figure 4 illustrates a decrease in total population change, due to increases to migration. Total migration of people into Broward has decreased significantly since 2010, but in 2022 we saw a significant increase overall. Furthermore, between 2018 and 2021, births have decreased while deaths have increased.

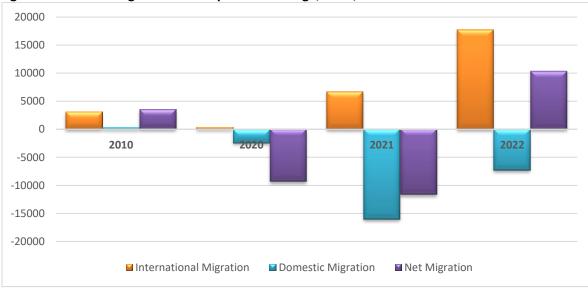

Figure 4. Broward Migration and Population Change, 2010, 2020-2022

Another source of migration into Broward County is the arrival of refugees, entrants and asylees. Individuals in this population in Broward primarily arrive from Haiti and Cuba. The total population of refugees, entrants, parolees and asylees has decreased in both Florida and Broward significantly from 2017 to 2020. However, there has been a large increase between 2020 and 2021.

EDUCATION

Broward County Public Schools is the nation's sixth largest public school system and the second largest in the state of Florida, with over 250,000 students in 241 schools, centers and technical colleges and 89 charter schools. The total enrollment for the 2021-2022 school year was 256,021 for all schools and charter schools. From the 2020/21 school year to the 2021/22 school year, there have been large decreases in enrollment in all grade levels except for high schools and charter schools which only saw minimal decreases. Enrollment by grade level is outlined in Table 8.

	Enrollment				
Grade Level	2019/2020	2020/2021	2021/2022		
PreK	5,714	5,061	4,771		
Elementary School	92,473	86,141	84,111

Green = Increased enrollment from the previous year; Yellow = Minimal change from the previous year; Red = Decreased enrollment from the previous year

At the beginning of the 2020-2021 school year, White students represented 51.2 percent of enrollment, while Black students represented 40.6 percent and Hispanic students (of any race) 36.7 percent (Figure 5).

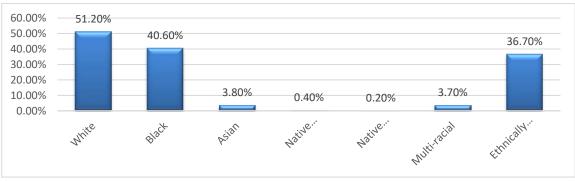

Figure 5. Broward Student Enrollment PK-12 by Race/Ethnicity 2020-2021

Source: Broward County Public Schools, http://www.browardschools.com/

As seen in Figure 6, the graduation rate in Broward County has increased from 81% to 89.1% over a 5-year period. Dropout rates in Broward have continued to decrease going from 2.5% to 1.8% in 2019/20. This is below Florida's rate of 3.4%.

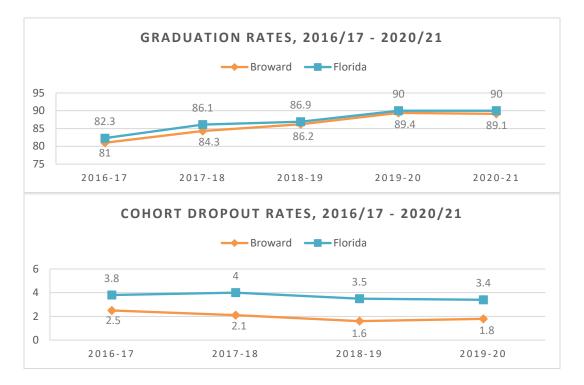

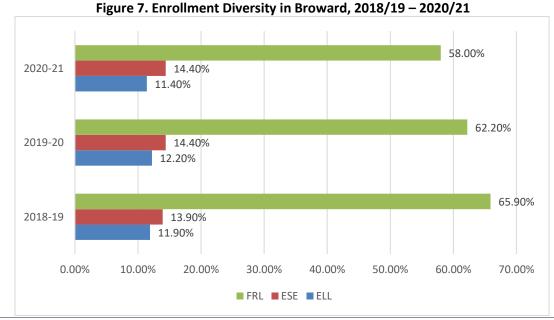

Figure 6. High School Graduation and Dropout Rates, Broward and FL

The figure below represents the enrollment diversity in Broward county. FRL means students enrolled for free and reduced lunch, ESE means students who are eligible exceptional student education, and ELL means students who are identified as English language learners.

INCOME

From 2010 to 2022, Broward's median income increased from \$65,747 to \$70,978. In 2022, median and mean incomes in Broward County households both increased from the previous year. Table 10 outlines income and benefits with the corresponding number of households for Broward and Florida.

From 2014 through 2020, both total personal income (Table 11) and per capita income increased for residents of Broward County. **Personal income** is defined as the income received by all persons from all sources. Personal income is the sum of net earnings by place of residence, property income, and personal current transfer receipts. **Per capita personal income** is calculated as the personal income of the residents of a given area divided by the resident population of the area.

EMPLOYMENT

Figure 8 outlines the size of Broward's labor force overtime compared with the number of people employed. As the figure illustrates, the labor force has exceeded employment consistently over time. In between 2020 and 2021, there was a decrease in both employment and labor force but there has been an increase in 2022 Broward County.

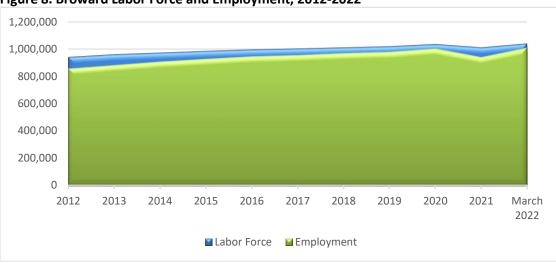

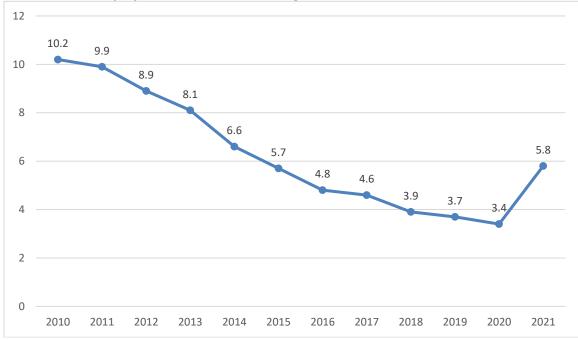

Figure 8. Broward Labor Force and Employment, 2012-2022

POVERTY

The percentage of people in Broward living below the poverty line from 2016 to 2021 is depicted in Table 16. This table shows that 12.6 percent of all Broward residents and 16.2 percent of people under the age of 18 are living in poverty. Female led households with children under 5 years old were most affected by poverty; 32.6 percent were reported at or below the Federal Poverty Level (FPL) in this demographic.

ALICE Report

Every two years the United Way produces the ALICE (Asset Limited, Income Constrained, Employed) Report which examines individuals and families that earn more than the Federal Poverty Level (FPL) but less than what it costs to survive. The purpose of this report is to give an alternate perspective to the FPL and provide a more in-depth depiction of the number of households that are struggling financially. One aspect of ALICE is to estimate a bare-minimum budget that a household can survive on. This budget takes into consideration monthly costs (for a single adult and family of four) including: housing, childcare, food, transportation, health care, miscellaneous, and taxes. Table 17 shows the household survival budget for Florida and Broward County. As seen in the table, it costs more to survive in Broward County as a single adult or in a family when compared to Florida as a whole.

Table 18 outlines the number of people in Broward and Florida receiving various forms of public assistance.

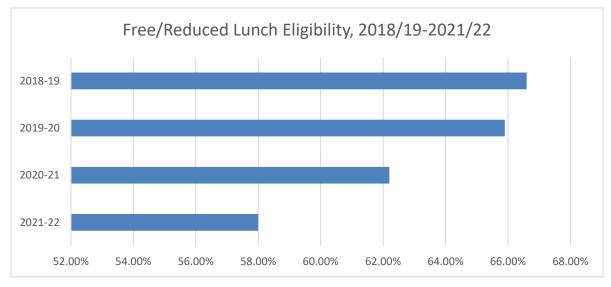

Source: Broward & State of Florida Public Assistance Caseload Report, 2021-2022

Another form of public assistance is the Broward County School Board Lunch Program. In order to qualify for reduced lunch, a household must have an income that is 185% of the poverty line. The following criteria outlines those who qualify for free lunch:

- All children in households receiving benefits from Florida SNAP, TANF or the Food Distribution Program on Indian Reservations.
- Foster children under the legal responsibility of a foster care agency or the court.
- Children who meet the definition of homeless, runaway or migrant. •
- Those who are at or below 130% of the poverty line.

Figure 13 outlines the percentage of students eligible for the free and/or reduced lunch program from 2018/19 to 2021/22. The table illustrates a decrease in the percentage of students who are eligible for free lunch.

PUBLIC TRANSPORTATION

Transportation is a key component to ensure community access to a variety of services, including healthcare. This need is further enhanced in difficult economic environments. Lack of transportation to healthcare facilities is frequently cited by patients as a barrier to accessing healthcare services. Access to transportation was identified as an "environmental influence [that is] positively associated with physical activity among children and adolescents." Table 19 highlights the average weekday ridership for Broward and Miami-Dade Counties compared to their population size.

	Population	Avg. Weekday	
	Size*	Ridership†	
Broward County Transit (BCT)	1.0 million	70 400	
Broward County	1.9 million	70,466

HOUSING

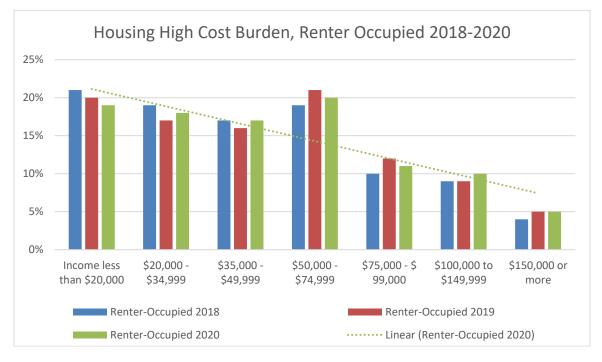

Economic crises, including unemployment and foreclosures, increase the number of individuals and families at risk of becoming homeless. The growing foreclosure crisis among Florida homeowners has created a new group of homeless individuals and added to the demand for affordable rental housing. Table 20 depicts the gross rent reported for Broward in 2019 and 2020. The 2020 median rent in Broward was \$1,433, with 39.9 percent of rental units falling between \$1,000 and \$1,499. There was a slight decrease from 2019's median rent which was \$1,448.

Many residents in Broward County find themselves paying more than 30% of their monthly income for housing. Figure 14 displays a comparison between owner-occupied and renter-occupied income to housing cost ratio from 2018 to 2020.

Source: American Community Survey (S2503) 2018, 2019, 2020

Homelessness among Broward residents has been difficult to overcome due to insufficient affordable rentals and increases in the cost of living. According to the annual Point-in-Time Homeless Count (a 24-hour count of individuals and families who are considered homeless per HUD's definition), there were 2,561 persons experiencing homelessness in Broward County on March 20th, 2021. Of this number 1,767 were experiencing unsheltered homelessness.

The Broward Coalition for the Homeless reports many homeless people arrive in winter and stay because the climate allows them to live outside without shelter, exposing them to a host of social, environmental and health-related dangers. Many undocumented immigrants and part-time workers come to Broward because of its attractive seasonal labor market from November to April but they cannot afford housing.

Figure 15 illustrates foreclosure activities in Broward County, Florida from January 2021 to December 2021. Table 21 and 22 show the totals and ratios of Broward foreclosures and evictions from 2019 to 2021. Table 23 compares the ratio and totals of foreclosures and evictions in Broward, Miami-Dade, Palm Beach and Florida. As evidenced by Table 23, Broward County's foreclosure ratio is worse than Palm Beach and Florida.

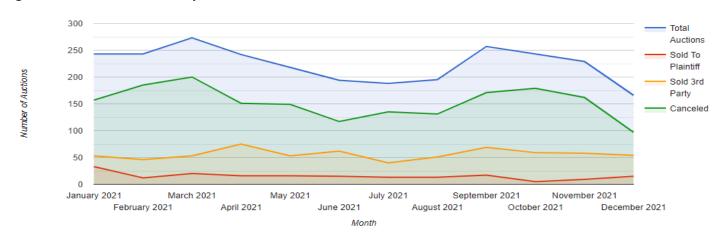

Figure 15. Foreclosures Activity, 2021

Source: BrowardHomeAuctions.com

Table 21 and 22 compare Broward's foreclosure filings and rates from 2019 to 2021. Broward has seen a decrease in foreclosure since 2019. However, there has been an increase in evictions from 2020 to 2021.

Table 21. Broward	Table 21. Broward Foreclosures										
	Total Foreclosure Filings	per 1,000 owner households									
2019	3595	8.19									
2020	1309	2.98

HEALTH INSURANCE

Table 24 highlights the health insurance trends for the United States, Florida and Broward. At 12.7% in 2022, the Broward uninsured rates remain higher than the United States and Florida. This indicates that Broward is disproportionately impacted by a lack of healthcare coverage. However, Broward's uninsured rate decreased by 5% from 2021 to 2022. Florida's uninsured rate also decrease by about 1% between 2021 and 2022.

Insufficient health insurance benefit packages impact the care of insured residents and demand for publicly funded services. There is no reliable State or local data measuring the actual number of underinsured individuals whose health insurance benefits are insufficient to cover catastrophic medical events, or who have capped benefits requiring large out-of-pocket payments.

UNCOMPENSATED CARE

Table 25 depicts the amount of uncompensated care provided by Broward hospitals in FY2020. The Agency for Healthcare Administration (AHCA) defines uncompensated care as charity care for which there is no compensation other than restricted or unrestricted revenues provided by local government or tax districts. This care is provided to patients whose family income is less than or equal to 200 percent of the poverty level. In 2020, the two hospitals with the most uncompensated care were Memorial Regional Hospital (\$432,135,188) and Broward Health Medical Center (\$265,881,916).

CRIME

Crime indirectly and directly impacts health through various pathways, including increasing stress and causing injury or even death. Table 26 compares the Broward County crime rate to the Florida crime rate from 2011 to 2020. Broward's index rate of crime per 100,000 for 2020 was 2,435, which was above Florida's 2,152. As depicted in Table 26, Broward's overall crime rate has exceeded that of Florida's since 2011. Since more than five million tourists and non-residents spend time in Broward each year, population-based crime statistics may be misleading.

*= juridictions where Broward Sheriff 's Office serves

Since 2016, there has been a steady decline in the number of youths arrested for delinquency. Figure 16 displays the number of unduplicated youths versus the total number of arrests for delinquency from 2016 to 2021.

Arrests represent the amount reported to JJIS by delinquency workers throughout the state. The number of arrests received is determined by counting only the most serious offense for which a youth is charged on any specific date, as recorded on JJIS. If the same youth is arrested for several offenses on the same date, that is counted together as one arrest. If that juvenile is arrested for one or more offenses on another date it is counted as another arrest.

Youth represents the number of youths arrested. This is determined by counting only the most serious arrest for which a youth is charged during any fiscal year. If the same youth is arrested for several offenses during that year, only one would be counted, using the most serious offense charged during the fiscal year.

Figure 16. Broward Juvenile Delinquency Total Youth (unduplicated) and Arrests, 2016/17-2020/21

DOMESTIC VIOLENCE

Table 29 depicts domestic violence statistics from 2012 to 2020. In 2020, the offenses with the greatest number of occurrences were simple assault (4,308), and aggravated assault (1,066). During 2020, a total of 5,598 domestic violence cases were reported, a slight decrease from 2019, but an overall increase in cases when compared to 2018.
