INTRODUCTION

Chapter III provides an overview of health resources currently available in Broward County. This includes a discussion of Primary Care Centers, Urgent Care Centers, the Florida Department of Health in Broward County, Hospitals, and Nursing Homes, as well as other healthcare providers and programs. Additionally, the health professional shortage and medically underserved population designations and their impact on Broward are discussed.

HEALTH PROFESSIONAL SHORTAGE AREAS

Health Professional Shortage Areas (HPSAs) are geographic areas, demographic population groups (such as low income or homeless), or institutions (medical or other public facilities) with a shortage in health care professionals. The HRSA Bureau of Health Professionals designates three HPSA provider categories: primary medical care (MAP 1), dental health (Map 2), and mental health (MAP 3). The HRSA Bureau of Health Professionals designated 125 Broward Census Tracts (45% all Broward Census Tracts) and 12 low-income population groups, comprehensive health centers (CHCs) and Native American tribal populations as primary medical care provider HPSAs (Table 1), three as dental provider HPSAs, and three as mental health provider HPSAs (Table 2).

Map 1. Primary Care Health Professional Shortage Areas by Census Tract, 2023

Source: Health Resources and Services Administration, <http://hpsafind.hrsa.gov/>
 FTE = # FTE non-Federal primary medical care/dental/mental health providers serving the area, population group, or facility
 Score = HPSA Scores are developed for use by National Health Service Corps in determining assignment of clinicians priorities. Scores range from 1 to 25 for primary care and mental health, 1 to 26 for dental. Higher scores equal greater priority. All FQHCs and those Rural Health Clinics providing access to care regardless of ability to pay receive automatic facility HPSA designation and may have a HPSA score of 0.
 # Short = # FTE providers needed to remove the designation [also known as the de-designation threshold].

DENTAL	Designation Type	FTE Short	Score
Broward Community and Family Health Centers, Inc.	Federally Qualified Health Center		25
North Broward Hospital District	Federally Qualified Health Center		25

MEDICALLY UNDERSERVED POPULATIONS

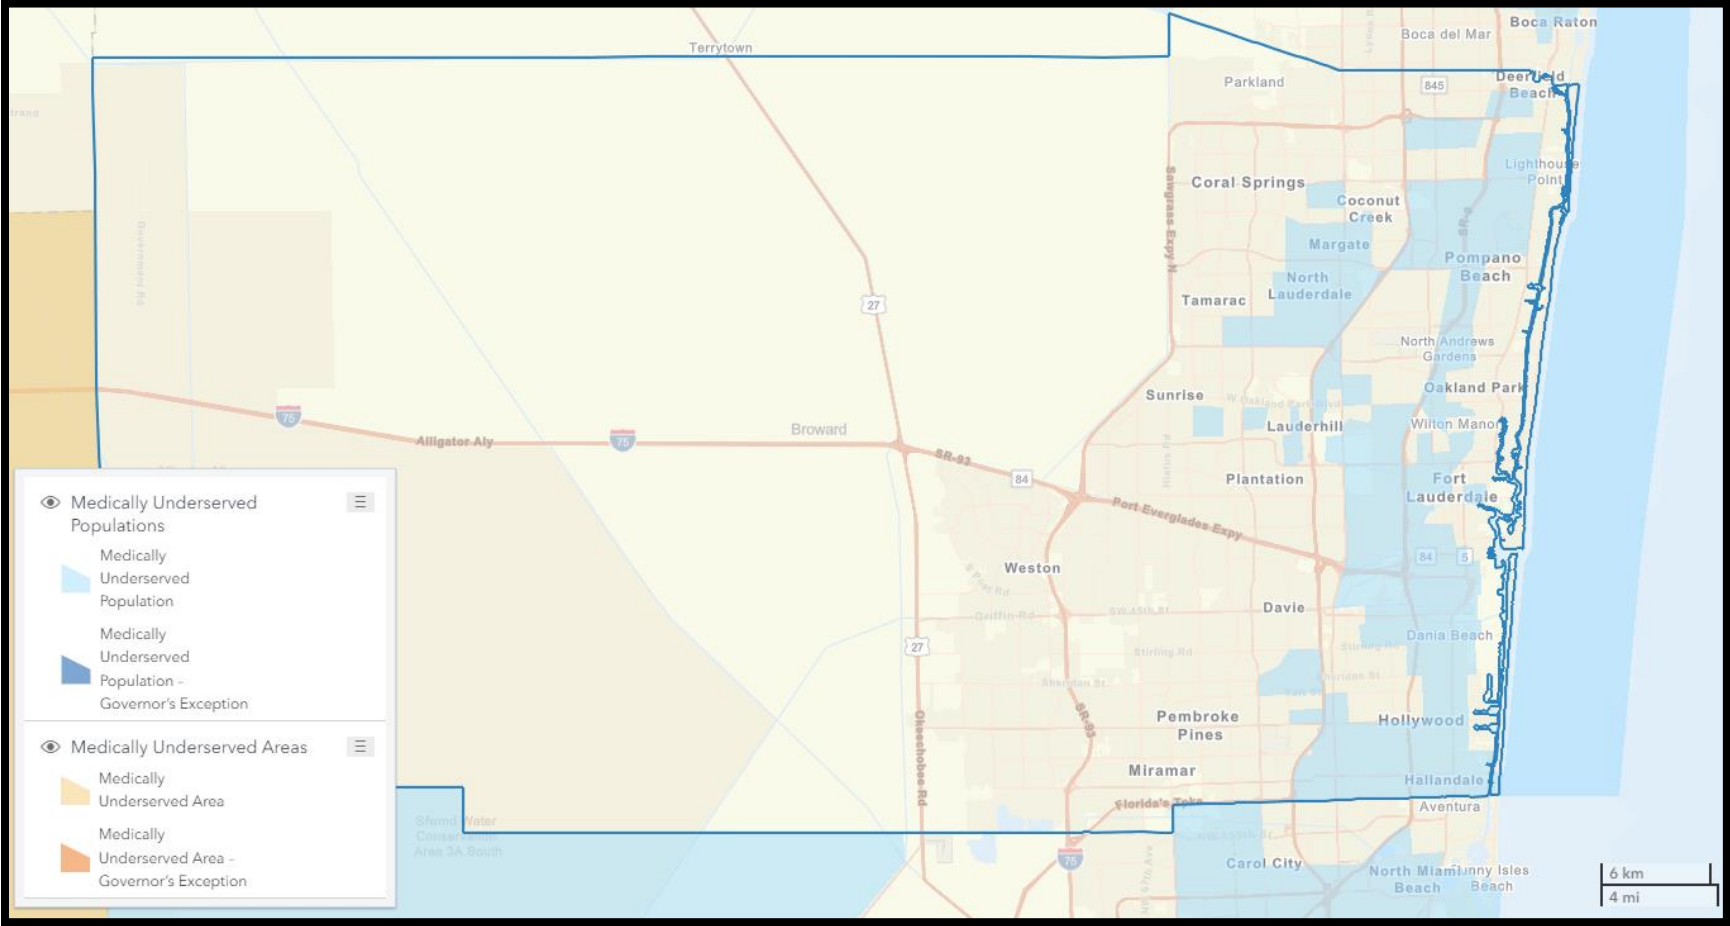

The HRSA Bureau of Health Professionals (BHP) designated 104 Broward County Census Tracts and 10 low-income population groups as Medically Underserved Populations who face economic, cultural, or linguistic barriers to health care. Table 3 and Map 4 depict the Medically Underserved Areas/Medically Underserved Populations (MUAs/MUPs) for Broward County.

Table 3. Medically Underserved Areas/Populations, 2023		
Location	Designation Type	MUA/MUP Score
Dania	MUP Low Income	50.4
Deerfield Beach	MUP Low Income	44.3
Fort Lauderdale/ Lauderdale Lakes	MUP Low Income	58.4
Hallandale	MUP Low Income	37.0
Hallandale/Miramar	MUP Low Income	50.2
Hollywood	MUP Low Income	54.2
Margate	MUP Low Income	60.4
Miramar	MUP Low Income	48.9
Pompano Beach	MUP Low Income	60.4
Sunrise	MUP Low Income	41.8

Source: Health Resources and Services Administration,
<https://data.hrsa.gov/tools/shortage-area/mua-find>

The lowest score (highest need) is 0; the highest score (lowest need) is 100. In order to qualify for designation, the IMU score must be less than or equal to 62.0, except for a Governor designation, which does not receive an IMU score. The score applies to the MUA or MUP as a whole, and not to individual portions of it.

PRIMARY CARE

The Primary Care System is unique in Broward. Primary Care in Broward is provided through a collaborative effort of the Florida Department of Health in Broward County, Broward County Government, Broward Community and Family Health Centers (Federally Qualified Health Center), Memorial Healthcare System (MHS), and Broward Health. Broward’s primary care system is a comprehensive system that continues to expand to address the changing needs of residents.

Primary Care in Broward County is provided by the two tax-assisted hospital districts (Memorial Healthcare System and Broward Health), the Federally Qualified Health Centers (Broward Community and Family Health Centers and the North Broward Hospital Districts’ Broward HealthPoint), and three local healthcare clinics (Light of the World Clinic, Inc., Living Waters Care Center, and West Park Community Health Center).

Table 4 lists Primary Care Centers in Broward. Please note this is not a comprehensive list; there are many other primary care facilities across Broward County.

BROWARD HEALTH

Broward Health is a public, non-profit hospital system governed by the North Broward Hospital District Board of Commissioners, a seven-member district board appointed by the Governor. The Board of Commissioners appoints the President/CEO and General Counsel. The President/CEO leads Broward Health's Executive Team. Broward Health offers a full spectrum of healthcare services. The District encompasses more than 50 healthcare facilities, including five hospitals: Broward Health Medical Center, Broward Health North, Broward Health Imperial, Broward Health Coral Springs and Salah Foundation Children’s Hospital. The District is a medical safety net for Broward residents. Broward Health provides a network of family primary health service sites offering affordable, comprehensive, quality primary and specialty health care . Through a variety of neighborhood health centers, Broward HealthPoint, a system of federally qualified health centers affiliated with Broward Health, provides prenatal care, prevention, education, outreach, case/disease management, primary care, specialty care, urgent care, dental care, and outpatient diagnostic testing. Broward HealthPoint operates neighborhood-based healthcare centers: Cora E. Braynon Family Health Center offers medical care one-stop shopping including routine adult and pediatric care, pharmacy, prenatal care, immunizations, social services, case/disease management and other services. Specialty Care Center combines HIV/AIDS care with routine and specialized healthcare services including family practice. Annie L. Weaver Health Center (provides comprehensive adult primary care services and HIV/AIDS care. Pompano Pediatric and Primary Care Center provides pediatric

primary, prenatal and maternal/childcare. Clinicas de las Americas offers culturally competent primary care services to the Hispanic/Latino community. Health care access is also made available in a number of other communities in Broward County through health centers are operated by Broward Health.

LIGHT OF THE WORLD CLINIC, INC.

The Light of the World Clinic is a community-based volunteer medical clinic providing free primary and specialty healthcare, screening and diagnosis with medical treatment and counseling to the economically disadvantaged in Broward. By providing medical services to individuals, their families and seniors who are generally without insurance or financial resources to obtain proper health care, we hope to eliminate healthcare disparities in our community. Our goal is to provide quality healthcare to qualified children, adults, and the elderly with special needs and chronic illnesses who are uninsured. We help the underserved, “the working poor” to improve their health, knowledge, and living standards by eliminating the cycle of poverty through healthy lifestyle changes, and access to care.

The clinic currently offers many different specialties and services to qualified patients in the areas of: General Medicine, Pediatrics, Cardiology, Dermatology, Ophthalmology, Gynecology, Endocrinology, Certified Diabetic Education, Infectious Disease, Nephrology, Pulmonology, Acupuncture, Urology, Dental, Neurology, prescription medications (when available) and laboratory services.

Operating five days a week from Tuesday through Saturday, the Clinic provides a full range of medical services, intervention, risk

factor reduction and prevention education. Volunteer doctors, nurses, and medical personnel help to facilitate these services in English, Spanish, Portuguese, and Creole. For those languages that the Clinic does not provide, the clinic will provide certified translation services. The Clinic provides culturally sensitive healthcare training and medical internships to students and volunteers from all medical disciplines through agreements with University of Miami Miller School of Medicine, Barry University, Florida Atlantic University, and Nova Southeastern University.

LIVING WATERS CARE CENTER

The Living Waters Care Center, affiliated with Gulf Stream Baptist Association, provides medical treatment, a food pantry, and referral services to low-income residents. Dental patients were seen and treated beginning in January 2002. The Center has two Care Centers: the North which has a vision clinic and the South which has a dental operatory. Both the vision and dental clinics are staffed *only when a volunteer is available*.

MEMORIAL HEALTHCARE SYSTEM

Memorial Healthcare System (MHS) provides primary care services for insured and uninsured within the South Broward, and Dade County District. The population consist of adults, pregnant women, High- risk obstetric, geriatric patients and limited pediatric services through our Safety Net Program. Our 14 practices are in Hollywood, Dania Beach, Miramar, West Miramar, Hallandale Beach, Pembroke Pines, Weston, and Miami Lakes.

Our Adult and Pediatric mobile medical units also provides medical services in the community. Adult primary medical

care services include medical care, specialty referrals, HIV counseling/testing, pharmacy, education, support groups, and social services. Pediatric services provide well and sick care for newborns through age 17, including specialty referrals, counseling, nutrition, immunization, and pharmacy. Obstetrician/gynecology services include prenatal care, high-risk, gynecology, specialty referrals, family planning, nutritional counseling, and educational classes.

Mobile units are highly visible in the community. The care team canvases neighborhoods identified with high patterns of health disparities and provides education and community resources to address many of the social determinants of health that are identified as barriers to health equity and access to care.

FLORIDA DEPARTMENT OF HEALTH IN BROWARD COUNTY

The Florida Department of Health in Broward County provides the following health services:

- Clinical and Nutrition Services
- Community Health Planning and Statistics
- Emergency Preparedness and Response
- Environmental Health
- Infectious Disease Services
- Community Health Programs

In addition to the primary preventive services, it provides a vast array of services directed toward the promotion and protection of the health of the community.

- The vital statistics section is responsible for recording all births and deaths within the county.
- The Epidemiology and Communicable Disease Staff:
 - Perform surveillance and investigate cases of reportable diseases and conditions
 - Investigate outbreaks of infectious diseases and institute prevention and control measures to stop the spread of disease
 - Provide education and technical assistance to healthcare providers and the community on the management of diseases of public health significance
 - Perform community outreach and health education activities related to communicable disease
- The environmental health/engineering section inspects, monitors, onsite sewage disposal, public swimming pools, radiological health, biomedical waste and specific facilities and food services. It also investigates public health complaints.

The Florida Department of Health in Broward County leads the Health and Medical Response (Emergency Support Function #8 (ESF8) at the Emergency Operations Center and provides the medical management of Special Needs Shelters.

VA OUTPATIENT MEDICAL CENTER

Broward does not have any military or VA hospitals. Broward residents utilize services at Miami-Dade and Palm Beach County facilities. However, Broward does have some outpatient VA facilities including Deerfield Beach VA Clinic, William "Bill" Kling Department of Veterans Affairs Outpatient

Clinic, Pembroke Pines VA Clinic, Hollywood VA Clinic, and NSU Veterans Access Clinic.

NOVA SOUTHEASTERN UNIVERSITY

Through education, research, and affordable patient care, Nova Southeastern University (NSU) is a major contributor to health and wellness in the Broward County community. NSU Health offers the full spectrum of health care services through its many South Florida locations where more than 250,000 patients benefited last year from first-class health services.

NSU’s Health Professions Division runs community-service health programs and clinics in dentistry, optometry, audiology, physical and occupational therapy, family therapy, and mental health. Its Speech-Language Pathology Clinic serves the needs children and adults suffering from communication disorders, and its Marilyn Segal Early Childhood Studies Center focuses on the wellbeing, education, and health of young children. NSU’s Public Health Program concentrates on training future leaders for community health planning.

EMERGENCY MEDICAL SERVICES (EMS)

Emergency Medical Services (EMS) are essential to the health and well-being of all citizens. EMS are activities or services to prevent or treat a sudden critical illness or injury. In addition, EMS provide emergency medical care and pre-hospital emergency medical transportation to sick, injured or otherwise incapacitated persons in this state. Table 3 lists the EMS Facilities in Broward.

AMBULATORY SURGERY

An ambulatory Surgical Center (ACS) or Mobile Surgical Facility is a facility whose primary purpose is to provide elective surgical care, in which the patient is admitted to and discharged from the facility within the same working day and is not permitted to stay overnight. These centers are not part of a hospital. Any facility or office which is certified or seeks certification as a Medicare ACS shall be licensed as an ACS pursuant to F.S. 395.003. Any structure or vehicle in which a physician maintains an office and practices surgery, and which can appear to the public to be a mobile office because the structure or vehicle operates at more than one address, shall be construed to be a mobile surgical facility. Ambulatory Surgery Centers can either perform surgeries in a variety of specialties or dedicate their services to one specialty. Table 14 lists the Ambulatory Surgical Centers in Broward.

OUTPATIENT CARDIAC CATHETERIZATION

According to AHCA, cardiac catheterization is defined as a medical procedure requiring the passage of a catheter into one or more cardiac chambers of the left and right heart, with or without coronary arteriogram, for the purpose of diagnosing congenital or acquired cardiovascular diseases, or for determining measurement of blood pressure flow. Cardiac catheterization also includes the selective catheterization of the coronary ostia with injection of contrast medium into the coronary arteries. Outpatient cardiac catheterization is defined as a person who receives cardiac catheterization in a healthcare facility and does not meet the definition of inpatient. Broward County does not have any outpatient cardiac catheterization facilities.

HOME HEALTH AGENCIES

Home Health Agencies provide the following services in a patient’s home or place of residence: nursing care; physical, speech, occupational, respiratory, and IV therapy; home health aide services; homemaker and companion services; home medical equipment, nutritional guidance, and medical social services. According to Florida Health Stat, there are currently 243 licensed Home Health Agencies in Broward.

HOSPICE FACILITIES

Hospices provide nursing, physician, social work, and pastoral services, as well as nutritional counseling and bereavement counseling for terminally ill patients and their families. Staff members are trained to assist the patient and family members who are dealing with death. These services are provided in the

patient’s place of residence, a hospital or a hospice facility. Hospice facilities are listed in Table 15.

NATIONAL COMMITTEE QUALITY ASSURANCE

The National Committee for Quality Assurance (NCQA) is a private, not-for-profit organization dedicated to assessing and reporting on the quality of managed care plans. NCQA is governed by a Board of Directors that includes employers, consumer and labor representatives, health plans, quality experts, policy makers, and representatives from organized

medicine. NCQA's mission is "to provide information that enables purchasers and consumers of managed health care to distinguish among plans based on quality, thereby allowing them to make more informed health care purchasing decisions." NCQA is organized around two activities, accreditation and performance measurement. These activities have been integrated under NCQA's Accreditation '99 program, which includes selected performance measures in such key areas as member satisfaction, quality of care, access, and service.

Accreditation Association for Ambulatory Health Care (AAAHC)

The Accreditation Association for Ambulatory Health Care (AAAHC) is a private, not-for-profit organization formed in 1979 to assist ambulatory health care organizations in improving the quality of care they provide to their patients. It accomplishes this by setting standards, measuring performance, providing consultation, and education where needed, and ultimately, by awarding accreditation to those organizations found to be in compliance with its standards. AAAHC was incorporated in 1979 as a non-profit 501(c) 3 in Illinois, but its history spans more than twenty-five years of independent and cooperative efforts by many national organizations, all dedicated to high quality ambulatory health care. Since its founding, AAAHC has conducted hundreds of accreditation surveys of all types of ambulatory care organizations including ambulatory surgical facilities, college and university health centers, single and multi-specialty group practices, and health networks. Over 1300 organizations nationwide are currently accredited by

AAAHC. AAAHC has conducted surveys in nearly every type of ambulatory health care organization including: ambulatory clinics and surgery centers, single- and multi-specialty group practices, health maintenance organizations, independent physician associations, birthing centers, college and university health services, faculty medical practices, community health centers, Indian health centers, hospital-sponsored ambulatory health services, urgent and immediate care centers, office-based surgery centers and practices, pain management clinics, podiatry offices, and networks and groups of ambulatory care organizations. AAAHC has surveyed managed care organizations over the years as a part of their regular accreditation activity. In this regard, it is significant to note in September of 1996, AAAHC became the first accreditation organization to conduct an accreditation survey of a pure Independent Physician Association (IPA) at the University of Southern California. Based on this experience and its surveys of managed care organizations, in April of 1997, AAAHC adopted special standards for managed care professional services delivery organizations. These standards focus on system-wide mechanisms for evaluating providers of care functioning within managed care systems, and for assuring standards of compliance. The standards address such critical issues as the organization's communication mechanisms to patient members; grievance resolution systems; consumer information; appeals procedures; and utilization management. In addition, AAAHC has undertaken specialized reviews for state agencies and in conjunction with state regulatory requirements which have resulted in extensive involvement in external reviews of managed care organizations. AAAHC has been designated as an approved external HMO review entity

not only in Pennsylvania, but also in Oklahoma and Kansas. These states require periodic review of HMOs as a condition of licensure. AAAHC has also been named as an approved HMO accrediting body in Florida where legislation requires HMOs be accredited as a condition of licensure.

PRIMARY STROKE CENTER CERTIFICATION

The Joint Commission’s Primary Stroke Center Certification Program is based on the Recommendations for Primary Stroke Centers published by the Brain Attack Coalition and American Stroke Association’s statements for stroke, to evaluate hospitals functioning as Primary Stroke Centers. Program seeking Primary Stroke Center Certification must meet eligibility requirements outlined in the *Disease-Specific Care Certification Manual* as well as use a standardized method of delivering clinical care based on evidence-based guidelines (i.e., Brain Attack Coalition’s Recommendations for Primary Stroke Centers and guidelines developed by the American Heart Association/American Stroke Association). In September 2012, The Joint Commission and the American Heart Association/American Stroke Association launched Advanced Certification for Comprehensive Stroke Centers (CSCs). This new level of certification recognizes the significant resources in infrastructure, staff, and training that comprehensive stroke centers must have to provide state-of-the-art complex stroke care. Table 16 highlights the facilities that received “The Gold Seal of Approval from the Joint Commission.”

CHILDREN’S DIAGNOSTIC/TREATMENT (CDTC)

The Children’s Diagnostic and Treatment Center (CDTC) provides services to infants, children, youth, and families through five comprehensive programs: primary and specialty medical care, research, early intervention, HIV/AIDS, and home-based interventions. CDTC provides care to children living with chronic illnesses or developmental disabilities and has maintained a particular commitment to those families having the fewest means with which to meet the complex needs of their children. The center serves homeless children and those in the care of the child protection system, as well as children who are at grave risk for medical and/or developmental disabilities. CDTC has agreements with all birthing institutions to screen all the babies in Broward. CDTC is a subsidiary of Broward Health (the North Broward Hospital District), which provides some administrative support and financial assistance. The budget is predominately funded by federal, state and local grants.

HOMELESS ASSISTANCE CENTERS

There are housing assistance programs ranging from emergency housing to housing for persons with HIV/AIDS. The Broward County’s Homeless Coordinated Entry and Assessment Screening, Information and Referral (CEASIR) Helpline operates the Homeless at 954-563-HELP (4357). Many of the resources below (Table 17) can be accessed through this helpline.

PRENATAL AND CHILDHOOD INITIATIVES

HEALTHY START

Broward Healthy Start Coalition, Inc. was incorporated on February 14, 1992 and is the leader in Maternal and Child Health policy and programming in Broward County. The Coalition receives funding from the Florida Department of Health and the Agency for Health Care Administration, through the Healthy Start MomCare Network, and is responsible for the formation and administration of the Healthy Start system, which includes management of subcontracts for quality services to pregnant women and children birth to age three and monitoring services through quality improvement and assurance responsibilities and accountability. Since its formation, the Coalition has expanded its funding from federal, state and local sources to broaden the scope of services provided beyond the Healthy Start model to ensure comprehensive programming.

The primary goals of Healthy Start are to:

- Reduce fetal and infant mortality and morbidity.
- Reduce the number of low birth weight and preterm births.
- Improve maternal and child health developmental outcomes.

The staff of Broward Healthy Start Coalition is proud to facilitate this organization’s mission to support new mothers and babies and demonstrate a measurable positive impact upon maternal and child health services and outcomes in Broward County. They are dedicated to upholding our

legislatively mandated role as Broward’s maternal and child health leader.

Healthy Mothers, Healthy Babies Coalition Broward

Healthy Mothers, Healthy Babies Coalition of Broward County, Inc. (HMHB/Broward) was formed in 1987 in response to a high rate of infant mortality in Broward County, Florida. For over thirty-five years, the agency has developed and implemented innovative programs and services for low-income pregnant and parenting families, focusing on zip codes at high risk of infant death, poor maternal/child health, and child endangerment.

HMHB/Broward is a 501(c)3 organization whose mission is strengthening families and improving birth outcomes in the underserved community within Broward County through comprehensive programs, education, and access to vital support services.

NURSE FAMILY PARTNERSHIP

The Nurse-Family Partnership (NFP) Program works with high-risk mothers of the community. The program is aimed at improving prenatal care, decreasing infant mortality rate, and promoting breastfeeding in the community. NFP works with both at-risk first-time mothers and mothers with multiple births. The goal of NFP is to implement early interventions for these women. NFP strives to empower these mothers with support for the child's health and development and increase the economic sustainability of the families. Some of the qualifying events for the program include:

- Economic adversity
- Any form of High-Risk Behaviors
- Education levels
- Lives in Broward County in one of the following zip codes 33311, 33313, 33319, 33023, 33024, 33025, 33060, 33064, 33069

All participants for the program are screened through a collaboration with Broward Healthy Start Coalition and its funding providers. The program has grown from just assisting first-time mothers, to now include any potentially high-risk mother.

NFP services are delivered through a partnership between BRHPC and the two hospital districts in Broward: Broward Health and Holy cross Health. Each hospital district directly employs home visiting nurses who are trained and report to the

NFP Program Director employed by BRHPC. The program has a total of seven nurse home visitors; four from Broward Health and four from Holy Cross Health. The program is supported through the Maternal Infant Early Childhood Home Visiting Initiative (MIECHV) funding which is administered by the Florida Association of Healthy Start Coalitions. Oversight of the model fidelity is provided by the NFP National Service Office.

The NFP program is administered through a partnership between BRHPC and the two hospital districts of Broward County: **Broward Health** and **Holy Cross Health**. The hospital districts directly employ the nurse home visitors for the program who are trained and report to the Program Nurse Supervisor which is employed directly through BRHPC. NFP has eight (8) nursing positions total; four (4) from each hospital system. The NFP program is funded by the Maternal Infant Early Childhood Visiting Initiative (MIECHV) which is administrated by the Florida association of Healthy Start Coalitions.
